population and sustainability director,  
Center for Biological Diversity

*Carter Dillard,*  
director of litigation,  
Animal Legal Defense Fund

There are more than **7 billion people** in the world today and approximately  
**56 billion** land animals raised and slaughtered for food each year.  
Both of those numbers are quickly rising.

Population growth and meat consumption are some of the leading causes of the current **mass extinction crisis**, putting humans on the path to replacing other species with ourselves and the domesticated animals we eat, decimating what remains of our once biodiverse planet. And yet, environmentalists rarely mention either...
